

## Lorries, buses coaches and other heavy specialist vehicles – early adopters

Some vehicles first registered shortly before this date will also meet the Euro IV standard as some manufacturers started producing and using engines which met the Euro IV standard before 1 October 2006. These vehicles are known as ‘early adopters’.

We’ve worked with vehicle manufacturers to identify early adaptors. However, some early adopters could not be identified.

The following vehicle manufacturers have provided details of early adopters, and we’ve updated our database to show that these vehicles meet the required emissions standards:

- Alexander Dennis
- DAF Trucks
- Daimler Chrysler
- Iveco
- Scania
- Volvo

Please note that while these manufacturers have provided lists of all early adopters, there may be some information missing.

If your vehicle manufacturer is not listed above, we haven’t been able to confirm whether that manufacturer produced any early adopters. Please direct any enquiries about your vehicle to the manufacturer. If the manufacturer confirms your vehicle is an early adopter they’ll provide you with a letter stating that it meets the Euro IV standard.

### Registration

We cannot correct vehicle records over the phone so please do not call our contact centre. If your vehicle is confirmed as an early adopter you’ll need to register your vehicle with us. Find out how to register – [tfl.gov.uk/roadusers/lez/17702.aspx#tk-tab-panel-4](http://tfl.gov.uk/roadusers/lez/17702.aspx#tk-tab-panel-4)

Include:

- A copy of your V5C
- A copy of the manufacturer’s letter
- A covering letter stating your vehicle is an early adopter.

Please ensure you complete section 3.2 of the LEZ registration form. We won’t be able to update your records without this information.

### Contact details for common manufacturers.

The following table outlines the contact details for common manufacturers. TfL will add to this table as further information becomes available.

Manufacturer	Contact name	Contact details	Notes
Mercedes-Benz UK Ltd	Commercial Vehicle Sales Engineering Department	<a href="mailto:sales.engineering@daimler.com">sales.engineering@daimler.com</a>	

## Larger vans, minibuses & specialist diesel vehicles – early adopters

We've worked with vehicle manufacturers to identify the vehicle types affected. However, some early adopters could not be identified.

For some makes and models, it's possible to use the date of registration to find out if the vehicle is an early adopter. To find out your vehicle's date of registration, check your vehicle registration certificate (V5C) under field B, Date of first registration.

The makes and models where this method can be used are shown in the table below. If your vehicle was first registered after the date listed in the table, it will meet the LEZ standards. This applies only to the exact makes and models (and other derivatives) listed in the table.

Make/Model	Registration date from which new vehicles meet the standards
Ford Transit	1 July 2000
Vauxhall Vivaro	All models
Renault Traffic	1 September 2001
Nissan Primastar	All models
Volkswagen Caravelle	1 March 2001
Land Rover Defender, 90, 110	6 August 2001
Land Rover Freelander	14 September 2000
Land Rover Discovery, Discovery Series 2	2 July 2001

If the information contained in the table above shows that your vehicle is an early adopter, but your vehicle is shown as not meeting the required LEZ standards on the compliance checker, you will need to register your vehicle with TfL, including a copy of the V5C

If your vehicle is not listed, we've been unable to confirm if there are any early adopters for your vehicle type. Please direct any enquiries about your vehicle to the manufacturer. If the manufacturer confirms your vehicle is an early adopter they'll provide you with a letter stating that the vehicle meets the Euro 3 standard.

### Registration

We cannot correct vehicle records over the phone so please do not call our contact centre. If your vehicle is confirmed as an early adopter you'll need to register your vehicle with us. Find out how to register – [tfl.gov.uk/roadusers/lez/17702.aspx#tk-tab-panel-4](http://tfl.gov.uk/roadusers/lez/17702.aspx#tk-tab-panel-4)

Include:

- A copy of your V5C
- A copy of the manufacturer's letter
- A covering letter stating your vehicle is an early adopter.

Please ensure you complete section 3.2 of the LEZ registration form. We won't be able to update your records without this information.
